OFR 90-023

SELECTED BIBLIOGRAPHY OF THE GEOLOGY (INCLUDING ECONOMIC GEOLOGY) OF CARBONIFEROUS BASINS IN NOVA SCOTIA

NOVA SCOTIA DEPARTMENT OF MINES AND ENERGY
OPEN FILE REPORT 90-023

Compiled by R. C. Boehner
Nova Scotia Department of Mines and Energy
Mineral Resources Division
PO Box 1087, Halifax
Nova Scotia B3J 2X1

INTRODUCTION

This bibliography was prepared to assist in accessing the voluminous technical and scientific literature pertaining to the geology of Carboniferous basins in Nova Scotia. Particular, but not exclusive emphasis is placed on the economic geology of these basins. This bibliography emphasizes the relatively recent publications (1960s to date) that are closely related to the topic. The bibliography is selective and consequently cannot be considered a complete source of all published information. Additional sources for related references, especially the early historical literature, include: (1) references cited within the publications, (2) various publication lists and indexes of maps, reports, bulletins, memoirs, theses, assessment reports, open file maps, and open file reports available through the Nova Scotia Department of Mines and Energy and the Geological Survey of Canada, and (3) searchable computer databases such as Geoscan, Georef, Assessment Reports and Drillholes.

For further information please contact the Library, Nova Scotia Department of Mines and Energy, P. O. Box 1087, Halifax, Nova Scotia, B3J 2X1; (902) 424-8633.
